# SASHIKANTA BEHERA

QA Automation Lead | Senior SDET | Playwright (JavaScript) & API Automation | AI in Testing (MCP) | CSM
+91 8456865369 | sashikanta397@gmail.com | linkedin.com/in/sashikanta-behera | Hyderabad, India

## CORE COMPETENCIES

Quality Engineering, Test Delivery, Test Management, Test Lead, SDET, Test Strategy & Test Planning, Risk-Based Testing, Test Estimation, Functional Testing, Integration Testing, End-to-End (E2E) Testing, System Testing, Regression Testing, API Testing, API Performance Testing, Release Management, Quality Metrics & KPIs, Metrics & Reporting, Root Cause Analysis, Defect Prevention, Defect Management, Test Case Management, Test Automation Framework Design, Page Object Model (POM), Test Pyramid, Quality Gates, Test Coverage Metrics, Shift-Left Testing, Playwright, JavaScript, TypeScript, Node.js, REST API Automation, Selenium WebDriver, Java, SQL, Source-to-Target Validation, CI/CD, Jenkins, GitHub Actions, Git, Code Review, Agile, Scrum, Kanban, Scrum Master, Sprint Planning, Daily Stand-ups, Backlog Grooming / Refinement, Retrospectives, Mentoring and Coaching, Stakeholder Management, Generative AI in Testing, AI-Assisted Test Case Generation, AI-Assisted Test Data Generation, AI-Assisted Defect Analysis, Model Context Protocol (MCP), Agentic AI, Playwright MCP, Splunk MCP, Zephyr MCP, FTP, SFTP, FTPS Integration Testing

## PROFESSIONAL SUMMARY

Quality engineering lead with 7+ years at Celigo across test automation, test strategy and release sign-off, and a Certified ScrumMaster (CSM) with 5+ years as Scrum Master for 50+ releases. Signed off 100+ releases for five marketplace-to-NetSuite integrations (Amazon, eBay, Walmart, Shopify, Magento 2) and kept defect escape under 5%. Builds API and UI automation in JavaScript, with a REST framework and Playwright suites on the Page Object Model run through Jenkins and GitHub Actions, and also works with Java and Selenium WebDriver. Coached up to 8 junior QA engineers. Uses generative AI and MCP tools for test case generation, test data and defect analysis. Strong on order-to-cash data: orders, refunds, tax and settlements. Available to join immediately.

## PROFESSIONAL EXPERIENCE

**Senior Software QA Engineer I | Celigo, Hyderabad | Jan 2019 – Sep 2026**

*Quality Engineering, Test Automation & Test Leadership*

- Kept the defect-escape rate under 5% across five marketplace integrations with NetSuite (Amazon, eBay, Walmart, Shopify, Magento 2) by owning a risk-based test strategy for order, customer, item, inventory, fulfillment, cancellation, refund and settlement flows
- Cut manual regression effort by 30% and the regression cycle from ~5 days to 3 by rebuilding and extending the team's JavaScript/Node.js REST API automation framework
- Signed off 93% of 100+ releases on time, backed by a test plan, requirements traceability matrix and release-readiness report for each release
- Reduced post-release Shopify sync incidents by 25% by automating 20+ order and fulfillment scenarios against the REST and Admin GraphQL APIs (cursor pagination, mutations, webhook idempotency)
- Extended end-to-end (E2E) test coverage from the API layer to the browser layer of the NetSuite integration workflows by building Playwright (JavaScript) UI and API suites on the Page Object Model
- Raised the automated test pass rate from 80% to 95% within ~6 months by finding and fixing flaky tests caused by timing, sync and shared-dependency problems
- Got build-failure diagnosis down from ~2 hours to under 30 minutes with parallel Jenkins suites across 3+ concurrent projects and Splunk MCP for AI-assisted log and defect analysis
- Increased test scenario coverage by 30% and cut manual test case writing time by 40% by generating and updating cases from requirements with Zephyr MCP and using Cursor, ChatGPT, Claude and Grok for scripting and code review, with every output reviewed by hand
- Benchmarked per-record API processing time at multiple concurrency levels (API performance testing) by generating large synthetic datasets with Cursor AI and replaying them against the endpoints
- Reduced file-processing defects by 20% by validating FTP, SFTP and FTPS adapters, including credentials, certificates, retries and archiving
- Caught count, field and transformation errors before release across 5+ integration flows by running SQL source-to-target reconciliation
- Cut automated API test development time by 30% for a QA team of up to 5 engineers by building shared utilities for auth/token handling, assertions and data-driven runs
- Coached up to 8 junior QA engineers over 3+ years through onboarding, test-design pairing, automation code reviews and regular 1:1s
- Resolved 500+ customer support tickets on field mappings, NetSuite tax setup and inventory configuration
- Recovered Amazon's missing discount-tax percentage by tracing the gap to the SP-API order endpoint, rebuilding the value from settlement report data, and taking the fix to Product Management through the FRD process

*Scrum Master Responsibilities (5+ years, 50+ releases)*

- Served as Scrum Master for cross-functional squads for 5+ years across 50+ releases, facilitating sprint planning, daily stand-ups, backlog grooming and retrospectives using Scrum and Kanban
- Reduced sprint carry-over by 20% by running sprint planning, stand-ups, retrospectives and backlog grooming for cross-functional squads

## INTEGRATION PROJECTS

- **Amazon and NetSuite:** Order import, customer/item sync, inventory, fulfillment export, cancellations, refunds and settlements, including duplicate/invalid orders, API errors, retries, pagination and high-volume reconciliation
- **Shopify and NetSuite:** End-to-end flows via the Admin GraphQL API, including line-item discounts, multi-currency pricing, tiered tax, split fulfillments, webhook idempotency and rate limits
- **eBay and NetSuite:** Orders, customers, items, inventory, fulfillment and cancellations with taxes, discounts, shipping, multi-item orders and failed-transaction reprocessing
- **Walmart and NetSuite:** Product, order, inventory, fulfillment, cancellation and refund flows, including matrix items, variations, batch/page-size settings and partial failures
- **Magento 2 and NetSuite:** Simple and configurable products across customer, order, inventory, fulfillment and refund flows, in real-time and scheduled processing
- **File Adapters and Database Integrations:** Inbound/outbound FTP, SFTP and FTPS processing (certificates, large files, polling, recovery) and API/file/database reconciliation

## SKILLS

**Automation and API:** JavaScript, TypeScript, Node.js, Playwright, REST, GraphQL, JSON, Postman, schema/response validation, data-driven testing

**UI Automation:** Playwright (JavaScript, Page Object Model), Java (Core), Selenium WebDriver

**Test Design and Delivery:** Test strategy and planning, risk-based testing, functional, integration, system and regression testing, EP, BVA, decision table and state transition testing, exploratory testing, requirements analysis, defect lifecycle management, root cause analysis

**Microservices Testing:** Unit, component, integration and E2E testing, shift-left testing, chaos and resilience testing (pod-kill in Argo CD)

**Data and Files:** FTP, SFTP, FTPS, SQL, source-to-target validation, reconciliation

**CI/CD and Monitoring:** Jenkins, GitHub Actions, Git, GitHub, Splunk, Splunk MCP

**Process and Leadership:** SDLC, STLC, Agile/Scrum, Kanban, Scrum Master (5+ years, 50+ releases), test lead responsibilities, release management, test pyramid, quality gates, test coverage metrics, metrics and reporting, code review, sprint planning, daily stand-ups, backlog grooming, retrospectives, stakeholder management, mentoring and coaching, multi-team release orchestration

**Issue and Test Management:** Jira, TestRail, Zephyr, Zephyr MCP, Confluence

**AI in Testing:** Generative AI, AI-assisted test case generation, AI-assisted test data generation, AI-assisted defect analysis, Model Context Protocol (MCP), Cursor (incl. Composer), ChatGPT, Claude, Grok, Playwright MCP, Splunk MCP, Zephyr MCP

## CERTIFICATIONS

- Certified ScrumMaster (CSM), Scrum Alliance, 2022

## EDUCATION

MCA, Kalinga Institute of Industrial Technology University (2018)
